

The Australian designed and manufactured, **Autoflo Gooseneck-AA2** Mains Power Sensor Tap is an affordable solution for commercial applications, particularly in the food service and hospitality industries where a reliable and affordable hands free sensor tap is of paramount importance for prevention of cross-contamination and water conservation.

The **Autoflo Gooseneck-AA2** is a built for purpose product, with clever features incorporated. Upward facing lenses, sensor range adjustment, and LED power indicator coupled with a maximum run time to ensure water flow ceases should an obstruction be placed in the sensor area. The **Autoflo Gooseneck-AA2** has been the most consistent performer for many years in the food service industry, and will continue to ensure great performance for years to come.

FEATURES

- Sensor range adjustment incorporated
- Upward facing lenses to combat false triggering from reflective surfaces
- Gooseneck spout well suited to food preparation environments
- LED power indicator on sensor unit and power pack
- Removable solenoid filter basket
- Simple installation

Order Code: 100-0175

TECHNICAL SPECIFICATIONS

- SENSOR TYPE - Active Infrared
- SENSOR RANGE - 130mm factory set
- OPERATING SUPPLY - 24v AC Power Pack
- OPERATING PRESSURE - 50 to 500kPa
- RUN TIME - Maximum 90 secs
- FLOW RATING - 7 litres per minute
- SOLENOID - 24V
- MAX TEMPERATURE - 50°C

TYPICAL INSTALLATION

COMPONENTS SUPPLIED

	Item Code	Description
1	300-0180	Gooseneck Spout - angle
2	300-0181	Basin mount sensor
3	300-0183	24V AC Solenoid Valve
4	300-0124	24V Power Pack
5	300-3026	Sensor mounting kit
